

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A portable information terminal comprising:
 - a storage unit for correlating and storing location information and data;
 - a receive unit for receiving location information;
 - an extract unit for extracting data correlated with the received location information from among data stored in the storage unit; and
 - an information notification unit for notifying a user of the portable information terminal of information derived from the extracted data.
2. (Currently Amended) A portable information terminal of Claim 1, further comprising:
 - ~~an a user input operation~~ unit for ~~instructing to data~~ the user of the portable terminal to instruct the storage unit; and
 - wherein the storage unit, when the instruction is made by the ~~operation-user in the user input~~ unit, correlates and stores data and location information received by the receive unit.
3. (Currently Amended) A portable information terminal of Claim 1, further comprising:
 - a location information select prompting unit for prompting the user to select a location information from among different pre-stored location information; and
 - a data select prompting unit for prompting the user to select a data from among various pre-stored data; ~~and~~
 - wherein the storage unit correlates and stores data and location information selected by the user.

4. (Currently Amended) A portable information terminal comprising:

a receive unit for receiving location information;

a storage unit; and

an operation a user input unit for instructing a user of the portable information terminal to instruct the storage unit to store data; and

a wherein the storage unit for, when the instruction is made by the user in the user input operation unit, correlating correlates and storing stores the data and the location information received by the receive unit.

5. (Previously Presented) A portable information terminal comprising:

a location information select prompting unit for prompting a user of the portable information terminal to select a location information from among pre-stored location information;

a data select prompting unit for prompting the user to select a data from among pre-stored data; and

a storage unit for correlating and storing data and location information selected by the user.

6. (Previously Presented) A portable information terminal of Claim 1:

wherein the information notification unit is a liquid crystal display for displaying an image corresponding to the data, or is a speaker for outputting sound corresponding to the data.

7. (Currently Amended) A portable information terminal of Claim 1:

wherein the location information is a base station code of ~~the~~ a base station with which the portable information terminal is communicating.

8. (Currently Amended) A portable information terminal of Claim 4:

wherein the location information is a base station code of ~~the~~ a base station with which the portable information terminal is communicating.

9. (Currently Amended) A portable information terminal of Claim 5:
wherein the location information is a base station code of ~~the~~a base station
with which the portable information terminal is communicating.
10. (Currently Amended) A portable information terminal of Claim 1:
wherein
the portable information terminal has a GPS receiver; and
the location information is information obtained based on ~~the~~a signal received
by the GPS receiver.
11. (Currently Amended) A portable information terminal of Claim 4:
wherein
the portable information terminal has a GPS receiver; and
the location information is information obtained based on ~~the~~a signal received
by the GPS receiver.
12. (Currently Amended) A portable information terminal of Claim 5:
wherein
the portable information terminal has a GPS receiver; and
the location information is information obtained based on ~~the~~a signal received
by the GPS receiver.
13. (Previously Presented) A method of controlling a portable information
terminal, the method comprising the steps of:
correlating and storing location information and data;
receiving location information;
extracting data correlated with the received location information from among
the data stored at the storing step; and
notifying a user of the portable information terminal of information derived
from the extracted data.

14. (Currently Amended) A method of controlling a portable information terminal, the method comprising the steps of:

- receiving location information;
- instructing by a user of the portable terminal the portable information terminal to store data; and
- storing and correlating, when the instruction is made by the user at the instructing step, the data and the location information received at the receiving step.

15. (Previously Presented) A method of controlling a portable information terminal, the method comprising the steps of:

prompting a user of the portable information terminal to select a location information from among pre-stored location information;

prompting the user to select a data from among various pre-stored data; and

correlating and storing data and location information selected by the user.

16. (Currently Amended) A storage medium storing a program for enabling a computer to ~~execute a method comprising~~ carry out the following steps of:

correlating and storing location information and data;

receiving location information;

extracting data correlated with the received location information from among data which is stored at the storing step; and

notifying a user of the portable information terminal of information derived from the extracted data.

17. (Currently Amended) A storage medium storing a program for enabling a computer to ~~execute a method comprising~~ carry out the steps of:

receiving location information;

instructing by a user of the portable terminal the computer to store data; and

storing and correlating, when the instruction is made by the user at the instructing step, the data and the location information received at the receiving step.

18. (Currently Amended) A storage medium storing a program for enabling a computer to ~~execute a method comprising~~carry out the steps of:

prompting a user of the portable information terminal to select a location information from among pre-stored location information;

prompting the user to select a data from among pre-stored data; and

correlating and storing the data and location information selected by the user.

19. (Currently Amended) A program to enable a computer to ~~execute a method comprising~~carry out the steps of:

correlating and storing location information and data;

receiving location information;

extracting data correlated with the received location information from among the data stored at the storing step; and

notifying a user of the portable information terminal of information derived from the extracted data.

20. (Currently Amended) A program to enable a computer to ~~execute a method comprising~~carry out the steps of:

receiving location information;

instructing by a user of the portable terminal the computer to store data; and

storing and correlating, when the instruction is made by the user at the instructing step, the data and the location information received at the receiving step.

21. (Currently Amended) A program to enable a computer to ~~execute a method comprising~~carry out the steps of:

prompting a user of the portable information terminal to select a location information from among pre-stored location information;

B1

prompting the user to select a data from among pre-stored data; and
correlating and storing data and location information selected by the user.

B
